As one of South Africa's fastest-growing fintech platforms empowering over 5 million customers through a seamlessly connected ecosystem of lending, payments and insurance, Weaver Fintech Ltd (WVR) continues to redefine financial inclusion and digital innovation.

Weaver Fintech delivered a resilient first-half performance, growing group revenue by 10% to R2.8 billion as its payments-led Fintech ecosystem continued to scale across lending, payments and insurance.

The results reflect strong topline growth, accelerating fee-based revenue and disciplined execution. Profitability was impacted by lending credit performance with payment processing issues, macroeconomic pressure and a deliberate increase in credit provisions.

CEO, Sean Wibberley commented: "Our flywheel is accelerating. Payments provide the entry point, new products unlock growth and cross-sell, data and analytics deepen our moat, and frequent customer engagement drives exponential value creation. Our connected ecosystem is improving our customers' digital experience while also providing merchants with significant returns."
